

# PRESS RELEASE

DUBAI; September 15th 2011.

**Headline:**

**PRIME DELTA GENERAL TRADING LLC EXPANDS TO EUROPE**

**Subheadline:**

**Private equity company invests in renewable energy projects in Eastern and Southeastern Europe**

In the last weeks the Prime Delta General Trading LLC, a private equity company based in Dubai, has negotiated with various project development companies to move into the financing of solar, biogas, landfill degasification, wind, hydro and waste-recycling projects in various countries in Eastern and Southeastern Europe. With an company investment volume about a three digit million euros amount as well as bank financing the Delta Prime General Trading LLC will reach a technology and country diversification, so as to achieve a diversification of risk.

This week, Prime General Trading LLC signed a first cooperation agreement with Swiss Fact group based in Hünenberg, Switzerland, which is already active in project financing in solar, biogas, landfill degasification, wind, hydro and waste-recycling projects. The agreement includes an investment in the existing and future project financings. The scope of the project until 2013 has an investment volume of around 250 million Euros for plants producing renewable energy.

**- Notes to Editors -**

**About Delta General Trading**

**Prime Delta General Trading LLC** focuses on renewable energy projects that have the potential to offer sustainable long-term returns via various methods of green energy production.

**Prime Delta General Trading LLC** is a private equity company based in United Arab Emirates (DUBAI), employing a Swiss & British banking platform to ensure financial security for investors.

**Prime Delta's** primary goal is to promote financial security through sound renewable energy investments having a positive impact on the habitability of the planet. We have an aggressive plan to meet the world's need for clean energy, and we are interested in teaming up with industry professionals who share our passion for creating a more sustainable future for the world by focusing on green energy.

We support the manufacture and use of 100% re-usable solar modules. We are concerned about the correct installation of the modules, their application possibilities,

maintenance and disposal. We believe in completely new applications.  
We direct power and energy back towards Man and Life.
